AUDIO DRIVEN FACIAL ANIMATION. FASTER. BETTER.

OUR COMPANY

AUDIO DRIVEN FACIAL ANIMATION. FASTER. BETTER.

Through acoustic analysis and muscle dynamics, Speech Graphics' TIGA award-winning technology produces accurate, consistent, natural lip sync with remarkable full-face emotional expressions from audio alone.

Utilised by studios developing games for 90% of the world's AAA publishers, our software saves animators significant time, effort, and money in realizing the highest quality output.

Some of the titles we've worked on:

and more to be announced...

VISION

To be the world's go-to AI solution for animated characters and avatars.

MISSION

Speech Graphics provides best-in-class technology to create, animate, and deploy characters at scale.

We believe that animated characters driven by our technology have the power to create meaningful connections between the real and digital world.
